# Human Factors In The Built Environment

## Synopsis

Winner of the ASID 2014 Joel Polsky Prize. *Human Factors in the Built Environment* is a comprehensive and up-to-date resource that integrates the relationship of the human body and space planning to the design process for designers involved with the physical planning and detailing of interiors. Key topics include proxemics, anthropometrics, ergonomics, sensory components, diversity, global concerns, health and safety, environmental considerations, special populations and universal (inclusive) design. The text broadly covers space planning applications and the relationship of human factors to the design process for commercial and residential spaces from programming to post-occupancy evaluation. Nussbaumer addresses barrier-free design for new construction and retrofitting issues, and various contract design types such as offices, hospitality, and healthcare design. A global approach throughout includes U.S. imperial and metric systems of measurement.

## Book Information

Paperback: 400 pages

Publisher: Fairchild Books (December 19, 2013)

Language: English

ISBN-10: 1609015037

ISBN-13: 978-1609015039

Product Dimensions: 8.3 x 1 x 11.2 inches

Shipping Weight: 2.4 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars [See all reviews](#) (1 customer review)

Best Sellers Rank: #152,132 in Books (See Top 100 in Books) #31 in [Books > Engineering & Transportation > Engineering > Reference > Architecture > Codes & Standards](#) #207 in [Books > Arts & Photography > Architecture > Interior Design](#) #322 in [Books > Crafts, Hobbies & Home > Home Improvement & Design > Decorating & Design > Interior Decorating](#)

## Customer Reviews

Great insight into human factors in an easy to understand language.
