Mies Van Der Rohe: Farnsworth House-Weekend House (Mies Van Der Rohe Archive)

Synopsis

In 1945-50 Mies van der Rohe built the weekend house "Farnsworth House" in Plano, Illinois. Situated on the banks of a river, this house is constructed out of steel and glass and captivates with its clear proportions and reduction of the structure to its essence. The surrounding landscape provides a direct context. Werner Blaser who worked together with Mies van der Rohe, presents a vivid picture of this house, enlivened by his personal knowledge. Together with comments on the architecture and technology, the book is complemented by the author's personal experiences of working with Mies van der Rohe and impressions from Peter Palumbo, a former inhabitant of Farnsworth House.

Customer Reviews

a magnificent book about the last domestic project built by mies, where an extraordinary complexity of details results in a very simple home. truly the work of a lifetime achievement.

I love the Fansworth House but I've not been there yet. The book shows us full of images of the masterpiece and takes us into the house imaginarily. Black and white photos work very much and some Mies's drawings are also helpful to understand how the house was beyond the notions. It is still quite new and less is more, of course.
