## Customer Reviews

This book is different from Cynthia Knox's other books. It has basic instruction for colored pencil, oil, acrylic, watercolor, and more in the front section. The second section has full page color artworks to

recreate. The reason why I really love it is because there are actual templates and transfer paper in the back to use for drawing and painting these beautiful works of art on my own. This has made the projects very doable, and I recommend it for beginning and intermediate artists.

Love to color flowers.

The Trace Line series, seems to be a really great way to show how to color (outline) many objects that are the subject for the books! From here, you can read up on the insides, to figure out how to do many drawing techniques and how to do them. Its like having an art teacher in your room!

I love to watercolor paint flowers but the drawing takes a lot of time for me and this book is just what I needed. The book has some basic instruction in several different medium's but is not for beginners. The drawings are in great detail with colors used shown but for watercolor I will only be using the outline but for other medium's the detail may be nice to have. I do plan to get other books in the series,

My daughters and I are really enjoying this art book. The templates are helpful to get the flower designs on paper. We like using different mediums to create artworks - especially these beautiful flowers! I highly recommend this book to all artists.

Beautiful flowers to trace and color. But don't think they are easy. Phew I'm trying with colored pencils and guess that's not my forte. Next I'll try water color and acrylic. No matter what they are beautiful pictures to work from and nice clear and clean tracings. Color dots to show you colors used but you can always try different color. I've been trying to learn colored pencils but I stink. Going to try water color and then next acrylic. Wish me luck and I wish you luck too. :-)BTW Cynthia Knox is and unbelievable color pencil artist who teaches on Craftsy. When I saw the cover of this book I just knew it was her and sure enough it is!

Bought this for my girlfriend and she loves it. She traces the flowers on stretched canvas and then uses acrylic paint to finish the paintings. I am impressed at how beautiful the paintings are, with her limited time spent learning how.

I think this is great for non drawers like myself. They don't tell you how to color it but I think it's up to

the individual how they want to paint it. It's called creativity.
