### **Customer Reviews**

Creating portraits can often be a daunting proposition, even to the seasoned artist. Folks who can draw a still life or paint a landscape can find the human face much more challenging. But artists are drawn to the human face as a subject to draw and paint, so they seek guidance along their journey.

Pam Carrikerâ <sup>™</sup>s book offers that guidance in a thorough and unique manner. Pam covers the essentials with her face mapping technique that breaks the face into regions and makes feature placement so much more manageable. She addresses multiple angles of the face, including side view and three-quarter view, and also focuses on each facial feature in depth. Pam also guides the reader through lessons in color theory in a very practical and purposeful manner as it relates to the study of portraits; additionally, this information will also be helpful in a variety of creative exercises. The fifteen mixed media projects included in this book cover a wide range of techniques and materials; something to satisfy every learner, no matter what their skill level. It is very clear that Pam has an impressive working knowledge of a multitude of techniques and materials. She exposes the reader to new materials, but at the same time offers alternative, more common materials which can be substituted in the same project; thereby you can venture into the world of new materials or use those that you already have on hand. The techniques youâ <sup>™</sup>II learn will be applicable in a variety of mixed media projects, so although taught in regard to portraits, there will be carry-over to any number of projects. Throughout this book, the text is conversational and easy to follow, as if a friend were sitting by your side guiding you through lessons and projects. Helpful step-by-step color photos fully support each project.
