## Customer Reviews

When I first saw the book, I was like "Is this for real?". This book is huge! It's almost A3 size, and it's 272 pages thick. This is the IMAX of artbooks. If you look closely at the cover, you'll see the actual killbook attached in chains to the belt of Gabriel, the protagonist that artist Dan Luvisi has created for his story. Gabriel is a super soldier who was framed by a military corporation with global power. The story isn't really original, but it's still quite interesting to see this world that Gabriel lives in. With the help of a secret agent, he managed to escape the prison and is now back for revenge. This killbook collects all the bad guys on his hit list. The book is presented as a scrapbook, with photos, artworks, documents and notes. The writing style is like snapshots from what Gabriel still can

remember. Basically, there's no actual flow to the story. The book starts off with the introduction and background to the world, and then moves on immediately to the hit list, and ends with a gallery of concept art from children who still believe in the innocence of Gabriel. While the writing isn't as good as it can be, the idea is fantastic. There are lots of bad guys with profiles and interesting analysis. Since the genre is sci-fi, you get characters that are not humans. There is a lot of content to read through and digest. The last part of the book is quite creepy. It features fan art of Gabriel and other characters by children, fictitious of course, mostly under the age of 10. The artworks look great, and there lies the creepiness because the kid's photos are shown beside their art. It's difficult to imagine young kids creating such accomplished pieces of work.
