Hard Choices

Synopsis

Hillary Rodham Clinton's inside account of the crises, choices, and challenges she faced during her four years as America's 67th Secretary of State, and how those experiences drive her view of the future. In the aftermath of her 2008 presidential run, she expected to return to representing New York in the United States Senate. To her surprise, her former rival for the Democratic Party nomination, newly elected President Barack Obama, asked her to serve in his administration as Secretary of State. This memoir is the story of the four extraordinary and historic years that followed, and the hard choices that she and her colleagues confronted. Secretary Clinton and President Obama had to decide how to repair fractured alliances, wind down two wars, and address a global financial crisis. They faced a rising competitor in China, growing threats from Iran and North Korea, and revolutions across the Middle East. Along the way, they grappled with some of the toughest dilemmas of US foreign policy, especially the decision to send Americans into harm's way, from Afghanistan to Libya to the hunt for Osama bin Laden. Drawing on conversations with numerous leaders and experts, Secretary Clinton offers her views on what it will take for the United States to compete and thrive in an interdependent world. She makes a passionate case for human rights and the full participation in society of women, youth, and LGBT people. An astute eyewitness to decades of social change, she distinguishes the trendlines from the headlines and describes the progress occurring throughout the world, day after day. Secretary Clinton's descriptions of diplomatic conversations at the highest levels offer listeners a master class in international relations, as does her analysis of how we can best use "smart power" to deliver security and prosperity in a rapidly changing world - one in which America remains the indispensable nation.

Some disclosures up front:--Unlike some of the people who didn't like this book, I am a long-standing liberal Democrat. Among other things, this means that I'm not at all bothered by her constant digs at W's foreign policy (such as it was).--While I'm not one of those people who worships the ground Hillary Clinton even thinks about walking on, I greatly respect and even admire her. In retrospect, I think she'd have made a better President than Mr. Obama, and I'll likely vote for her in 2016 (and I have got to believe she's running).--I usually like or love books that combine politics with history. For all these reasons and more, it's totally disappointing that this book was so bad. Another reviewer called it "pabulum," and while I disagree with other comments he made, that one is spot on. The only thing good about the book is that it was organized by global region. Other than that, it's dull, pre-digested and formulaic. She manages to take matters that are fascinating, terrifying, dramatic or even "just" historically significant and turn them into pedantic pabulum (there it is again). As if that weren't bad enough, she feels compelled to give us at least one moral for every story, but in every case I can recall the moral was something like "I believe that it's important to reach out to people who disagree with you." That kind of thing is really insipid and, frankly, condescending to anyone who shells out big bucks to buy a book like that.

Alright. I will lay out my political outlook first. I am a Conservative who is a bit of a political junkie and I follow politics like one would follow sports. Even though I am a Conservative I enjoyed Barack Obama's "The Audacity of Hope" and "Dreams from my father". My favorite political autobiography was that of Ted Kennedy. The point is I can be non biased when it comes to literature. Hillary's "Hard Choice's" is a very boring book and that isn't always bad as long as it is informative but this book is not informative and its very partisan without details or explanation like Obama did in "The Audacity of Hope." For example. Clinton explains her work in trying to improve relations with Turkey in her tenure as Secretary of State. She explains how important Turkey is given its economy, education, and geo political position. She goes on to say the US has always enjoyed great relations with Turkey but these were dramatically ruined under Bush's Presidency and now she has to clean up the mess. This attack on Bush's foreign policy is a constant theme in the book which is OK except there is no explanation as to why Bush was unsuccessful in specific countries like Turkey. I personally know Bush and Turkey butted heads because Turkey constantly did cross border

operations into Iraq attacking the Kurdish community in the North. Bush threatened them with sanctions if they continued these operations as it was damaging our efforts there. It would have been useful to readers who were not in Iraq during that time period for her to explain that dynamic and then criticizing Bush's handling of it instead of blindly throwing jabs at Bush's foreign policy.
