Spanish For The Busy Medical Professional

Synopsis

Learn to communicate effectively with your Spanish speaking patients and their families in just five hours! Have you always wanted to learn Spanish but never found the time or the right teacher? Are you having trouble communicating with your Spanish speaking patients? Did you study Spanish in school, including medical school, but find yourself unable to construct even simple sentences in Spanish? This book is for doctors, nurses, emergency medical personnel, and all medical professionals in need of a Spanish beginners or refresher course. Due to our unique method of teaching, you will be amazed at how much Spanish you will learn and retain in just five hours! What makes this Spanish course special? Our breakthrough method allows you to retain most if not all of what you learn and immediately put it to use. The key is interactivity: instead of making you repeat words and sentences, you are encouraged to think and apply what you learned. Using the words and concepts you learn throughout the course, you will build Spanish sentences and translate Spanish sentences into English right from the start. The course also makes use of the many similarities between English and Spanish, so you can associate new Spanish words with English words you already know. You'll learn relevant words and sentences that you can put to use immediately. This will allow you to reinforce what you've learned through real life practice and motivate you to complete the course. This course only takes about five hours to complete. Many people buy expensive Spanish courses and never find the time to complete the course. But you should be able to find five hours. Even if you only study for half an hour each day, you'll be done in a little more than a week! Learning should be fun and rewarding. It is hard to describe the pleasure you experience when you manage to construct complete sentences in Spanish after just half an hour into the course. In addition, the course is peppered with quotes and anecdotes, to help keep the learning fun and exciting.

Book Information

Audible Audio Edition

Listening Length: 6 hours and 8 minutes

ASIN: B00DMHP616

Best Sellers Rank: #4 in Books > Audible Audiobooks > Language Instruction > Spanish #503 in Books > Audible Audiobooks > Health, Mind & Body #2995 in Books > Health, Fitness & Dieting

Customer Reviews

i got this before heading to mexico city for three months to help with a humanitarian aid group. the learning method was new to me, (ive tried other methods) this was the easiest and most natural learning method for me. i also didnt have to spend as much time as i initially thought i would

I haven't even finished reading it but wanted to review, because I am so excited that I finally found this book! For someone working in any medical office, this is it! I always had to pass on the phone to my colleague who speaks fluent spanish, and when people walked in I always stumbled and couldn't get a straight sentence out. Now I feel I know the basics very clear.. I can't wait to show off my knowledge in the office! I live in Brooklyn and definitely needed this! Since I hear alot of spanish i do know the right pronunciations for the words (just never learnt it) but i would probably recommend getting an audio version for someone who is totally new in the field. I also love the fact that after a few minutes you feel so successful because it builds on words you learnt, instead of memorizing lists and lists.

The way this book is organized is simple and effective. I bought this over whispernet in the airport before a 7 month trip to S.America and it helped me out. It obviously has examples for medical professionals, but it also helped me as someone who just didn't have any Spanish under my belt. Worth a lookover for people who have little to no Spanish knowledge. For those of you who can communicate on a basic level, this book is probably too low a level for you.

Off to Latin America for a summer internship working with disadvantaged communities in need of proper medical care. Don't have a lot of time to spare to learn a language yet this really has me going with confidence. Great idea and format - delivers what it describes as its purpose. I recommend this

Listening to this for 15 minutes a day on my way to the hospital has tremendously improved my ability to communicate with my patients. I recommend it to all my colleagues interested in improving

their Spanish. It will be useful if you don't speak any Spanish, but I think it would be best for people who have a little background already who want to really improve and gain tools for improving more down the road. I only wish there were more to follow this book!

As one of countless nurses who can muddle reading Spanish but have never finished a course tried, and having many Spanish speaking or ESL patients I can easily testify that this is the most specifically useful that I have ever seen. The teaching method is tailored to those of us who are lacking in free time but not desire to learn. We all know that ESL diminishes under stress, so being able to ask and/or instruct a patient in their own tongue is most desirable. The construction of the lessons is logical and applied, making it easy to assimilate. The audio performer has a pleasant voice with clear pronunciation and diction which leaves no room for interpretational error. Hearing is believing. I was fortunate to have received this audiobook as a gift

this was excellent. I wish they would do a sequel for more advancement, because this is honestly the most helpful any audiobook has ever been for me. The pneumonics they use are somewhat random but still effective (ie tomado tomato) I highly recommend this to anyone wanting to jumpstart their Spanish.
