## Customer Reviews

This is a beautiful coloring book filled with 63 different designs by the late Thomas Kinkade who is also known as the Painter of Light. My husband and I own a couple of framed prints by Mr. Kinkade and they are beautiful pieces of art that one can look at and lose themselves in. When I saw that Posh was coming out with a coloring book based on Mr. Kinkade's artwork, I pre-ordered it sight unseen. Sometimes that is a big risk but in this case, I am very pleased with the coloring book. The designs themselves are well done but do lack some of the smaller details. I plan to use a variety of markers and pencils and be able to add my own details with those. The book is so lovely to look at, my husband took one glance, tried to make off with MY book, and finally had to order his own because this is one that I do not intend to share. The designs are printed on the right hand side of with the photo of the actual painting on the left hand side (i.e., opposite each other in the book.) This

will allow me to look at the photo of the real painting while I am coloring my own. It also, in effect, has the printing of the design on one side of the page. If you don't care about the photos, you can use markers which will bleed through the page (see my coloring medium information below.) My silent video will show all of the pages of the book, both the designs and the photos. I will also upload a few pages in photos to show how the book is put together. Here is what I found in this coloring book: 63 Thomas Kinkade designs with 63 color photos as well. Designs printed on one side of the page with a photo on the back of the page. Paper is white, very slightly textured, non-perforated and medium weight.

If you like Thomas Kinkade's airy paintings and enjoy coloring, this may be just the thing for you. A slightly smaller format - 7" x 9 1/2" - or a little smaller than a sheet of notebook paper is made up for by nice production details, such as the rounder page corners and heavy-weight paper. The color reproductions are more than sufficient for the coloring guide. Two things to be aware of:-- the pages are printed on both sides, so a coloring page has the next color reproduction on the back. The upside is that you get a lot of reproductions and drawing pages in this book; the downside is that if you really go wild on the previous page - lots of wet marker work or grinding those colored pencils in there - you could buckle or engrave the reproduction on the following page.-- the coloring lines often indicate the light-dark tones of the painting more than the actual landscape composition. If you are planning on trying to copy Kinkade's color schemes, this will help more than hinder, but if you just want to color in the pages without reference to the color reproduction, it's going to be confusing. Think of a paint-by-number painting base drawing - I've attached a couple of photos to give you an idea what I mean. If you are really, really into Kinkade, none of the paintings are identified. Some time searching in Google images will probably get you the original information, but this is a disappointment. The scenes are mostly countryside but there are a few city scenes in the mix. If you want to get as close to Kinkade's original as possible, watch the textures. He always has a lot of texture going on in his work, especially in the rainy-day scenes.
