In today's interconnected, digital-first yet highly fragmented world, constant innovation and creativity are key to success, not to say a requirement, and can't remain an untapped resource. While particularly relevant in Advertising, this premise holds true for most industries. Existing literature tends to look at specific elements of Creativity in isolation, such as the creative mindset, creative techniques or creative end products, and thus misses the dynamics between these components. Breakthrough Thinking a holistic exploration of the various factors that impact the creativity of individuals, teams and organizations, and the interplay between those dimensions; it thus sits in a unique sweet spot. While Thomas Vogel's book is anchored in the solid theoretical foundation of the 4Ps, it demonstrates how this framework can and is applied hands-on by those who have been recognized for high levels of creativity in the advertising industry. As illustrated by a variety of excerpts from interviews with the brightest minds in the industry, creativity no longer resides within a single department but rather transcends every single aspect of successful and thus profitable advertising agencies " from the first conversation with a client to final delivery, from finding new audiences and new ways to reach them to leveraging new technologies and data sources, from strategy and media plan to defining and measuring success, from selling through ideas internally and to clients to constantly reinventing yourself as an organization, and from the people involved to the workplace environment and the outside world. Thomas delivers an engaging, highly relevant and thought-provoking guide how creativity and creative problem solving can be found, nurtured and optimized within the agency compound.
