Customer Reviews

This is a revised version of my review. The artist republished this book with a slightly different design mix. Of note, the zebra design and that of the horse with the Native American are no longer in the current version of the book. Additional designs have been added and deleted and some which remained were modified and/or cropped differently. It is different enough that I felt that I should re-purchase the book to update my video, my colored samples, and the design samples as well. This is my second coloring book of designs by this talented artist. Her first coloring book is one of a variety of animals, including horses. In this coloring book, horses are the main theme. The horses are beautifully and realistically drawn in the line form and then the artist adds other elements, shading and doodles with the horse to give the colorist the ability to have more fun when coloring the designs. The designs are fun, easy to color, and have a nice level of detail without having small and minute areas to color. There are 43 coloring designs (46 if you include the horses

on the intro pages to the book.) A number of the designs have gray scale shading already added to them, which makes shading easy as the base color (usually in marker for me) takes on a darker hue when put over the gray. The designs are printed on one side of non-perforated paper. The binding is glued rather than sewn so you will have to cut pages out if you wish to remove them. Only two of the designs merge into the binding, so you will lose some portion of the design if you cut the page out. A couple of other come close and you will have to be careful if you cut them out. I was able to break the spine of the book and get it to lay fairly flat.
