Façades: Design, Construction & Technology (Architecture In Focus)

Synopsis

The facade is the "skin" of a building. It forms the boundary between interior and exterior, form and function, between user and passersby. In addition to aspects of function, construction, design and urban space, increasingly sustainability parameters are gaining importance. Under these circumstances facades are assuming an even greater significance in the building industry today. This volume provides an overview of the entire spectrum and presents the great creativity and technical gamut of current facade types. The projects from around the world show in each instance how the relationship of interior and exterior must be defined, designed and implemented. Special emphasis is placed in the presentation on revealing photographs, technical specifications and detail drawings.

Book Information

Series: Architecture in Focus

Hardcover: 304 pages

Publisher: Braun Publish,Csi (May 16, 2012)

Language: English

ISBN-10: 3037681101

ISBN-13: 978-3037681107

Product Dimensions: 9.6 x 1.3 x 13.4 inches

Shipping Weight: 5.5 pounds (View shipping rates and policies)

Average Customer Review: 3.0 out of 5 stars See all reviews (2 customer reviews)

Customer Reviews

Great collection and cross section of impressive facade projects, but lacking a bit in the technical detail despite several drawings and details. Could have had some more explanations on the processes involved and the problems encountered and how they were resolved. Plus a bit more on the materiality of the facades. But otherwise great visual reference.

one issue about the hard cover is not printed cover. The printed skin is just a carton paper wrapped around the book hardcover
