# House Colors: Exterior Color By Style Of Architecture

## Synopsis

House Colors is the most comprehensive resource ever compiled on choosing exterior house colors. Sorted by architectural style, this format will allow the reader to pinpoint the colors that will best suit their style of home. It is the ultimate resource for those looking to achieve exceptional color combinations, from subtle to bold, that are so difficult to achieve without professional design assistance. The information included will supply the homeowner with all of the resource information from manufacturers and retailers that are needed to provide dazzling professional results that will increase the beauty of the home and neighborhood, increase curb appeal and add value to the property while creating pride of ownership for the homeowner.

## Customer Reviews

This book has been waiting to happen for years. If you've ever gone cruising neighborhoods to find the new colors for your house, with color fan and notebook in hand, you know it can take weeks to find just what you need. Susan Hershman has done the work for us at long last. Not only has she photographed almost two hundred beautifully painted houses, she discusses each color scheme and reveals the paint manufacturer, color number and many other essential details. The houses are of all styles and colors. They are mostly houses which the average American can relate to, no chateaux on the Loire or English stately homes. Her descriptions are insightful and help one figure out just what would be right for one's own particular situation. Essential reading even if you want to

develop your own unique color palette.

This is the best reference I have ever seen for exterior colors. The pictures are of real houses, not staged for photography and the book gives you the paint brands and numbers of the colors used on each house. Very very helpful. I found colors to paint my home I would have never thought to consider and I am a decorator. Thank you Susan!

This book will be very useful to laymen and professionals for use in selection of exterior colors and materials for new houses, remodelings, and even when the house is getting re-painted. Laymen, when re-doing their own house to whatever degree, would love the book because Ms. Hershman clearly and simply explains her points by use of examples (in beautiful photography) as well as the written word. For professionals, the book offers a collection of images and ideas that can be presented to their clients so that they can understand that color is not a "paint job". Rather, exterior color is really an integrated system of materials and colors--and that system can range from the very simple to the very complex. This book would be a wonderful addition to anyone's library.

This book is destined to be a classic for professionals and novices alike. Rather than another "pretty" book to add to the shelf, it is an extensive resource that can be used for years. If you've ever chosen a paint color only to have to change it several times, this will save your sanity and money. Susan is a professional who does the work for you. The resource section in the back of the book is amazing. If you want your house to be the one other's drive by and admire, buy this book. Bravo!

This is certainly the most comprehensive and helpful book out there on exterior house colors. It provides amazing photos that inspire great color combinations and also provides the resources to recreate what is shown on the pages. It's like having a personal designer right at your fingertips. Great resource!!!

This book is awesome!! The photos are beautiful, the information so well organized. What a fabulous resource, whether you are doing a house for the 1st time, you are in the biz, or you just enjoy lovely books. Color is so tricky and so misunderstood. Take the guesswork out with this amazing collection of references.

This book by Susan Hershman has been invaluable in many ways. Since we live in a Victorian City,

the book is a way to show off ours and other similar cities. We use Susan's book for ideas and suggestions for our neighbors when they are improving their homes. Visually, House Colors is so stunning that it is now our number one cocktail table book. We can't imagine anyone undertaking a project involving painting without utilizing House Colors.

This is a unique book filled with inspiration about not only color combinations for your home but also exterior home details. Hershman has put together an incredible work that every paint store in America should carry for their customers. All houses are referenced in the back listing exactly the paints they used. An incredible coffee table book but mostly a true guide for everyone about to spend gobs of money on paint and painters.
