This is my second coloring book by artist Juliana Emerson. The first, *œCute Cats* is one of my favorite realistic cat coloring books. In *œCreative Animals*, Ms. Emerson has created 30 *œdoodle* style animals with some with blank backgrounds and others in various settings. The outline of the animals is very realistic; however, the doodles give the colorist the ability to use many different colors in place of a realistic rendering of the animal. There are many animal designs in this book, including: lion, koala bear, elephant, cat, peacock and much much more. I am really pleased to see a *œdoodle* style book of original designs as so many others are simply licensing that I have already seen and colored before. My first project in this coloring book was the elephant in a savannah setting. I used my Tombows water-based markers for this design. I find that using the brush side gives a more muted water-color effect to my projects. I will provide a detailed description of what I found in the book below, but here is a quick overview: 30 Hand-drawn *œdoodle* style

animals designs Designs are printed on one side of non-perforated white page Glue bound Designs do not merge into the binding Alcohol and water-based markers bleed through page Gel pens and Pitt India Ink pens leave shadows of color on back of page Coloring pencils work well with this paper The designs are printed on one side of thin white non-perforated paper that is typical for books published by CreateSpace. The binding is glued but there is plenty of room for you to cut a page out if you choose to do so. The designs stop well before the binding. I was able to get the book to lay flat by press down hard on the open spine.
