I was looking for a manual on care for daisies, they run rampant in my yard. I saw the cover for this and figured it would be a perfect companion in my strategic yard care action plan. I do not recommend it for this purpose. In the pages of this book were stories that didn't help the daisies at all. And the dopey, toothy grin that daisy on the cover is giving? Reading my yard daisies these stories turned them into that. Except vicious. I still can't find my dog. I think they ate him. Buy this if you're looking for a coloring book. As a daisy care manual, you'd be better off torching the yard.

I was expecting a coloring book featuring Leigh's unique brand of cute and creepy artwork, which I got. I wasn't expecting the stories, thoughts, and all around fun that came with it too. All in all, it's a wonderful adult coloring book.

So excited! I love Leigh's art and he's an awesome Geek so it makes buying this even better! So happy I can support my fellow artists. Can't wait to get coloring! And I love all the little stories, that's a very nice touch.

Really, a true geek couldn't find a better source for dating advice, than is found here. I mean, you think you're just going to have a bit of fun with crayons, coloring monsters and such. And then, bam! There is the most perfect dating advice for the socially awkward! Moonwalking really was the missing key, for me. Thanks to Leigh and this coloring book, my happily ever after is within reach!

I no longer have to find cover in order to break out a box of coloring goodness. This is the produce that looks deeply in the eyes of people that continually feel the need to say, "coloring books are just for kids!" and tells them to "Hug Off!" The stories, the artistry, the unfettered enjoyment, and the quality is unparalleled since color was created. Not many inventors can fully predict where their hard-work will go, but in this case, I think Gutenberg knew EXACTLY what he was doing and what was to come. Loved every page. Loved every nuance. Love every late night of filling colorfully filling in the lives of all contained within Grimleigh's. Thanks for all the fishes, Geoff P.S. Geekshow says, "Hey."

I have enjoyed Leigh's craft for years, including the Grimleigh creations he & his wife would make, the food prepared & distributed by the Kades, his storytelling, & his artwork on the page. While I am hard pressed to draw a straight line with a rule in hand, this book has me wanting to hold a coloring tool in an artistic way for the first time in many years. Along with the challenge to bring a colorful life to his creatures, Leigh's stories for them (and giving others the chance to write stories for the creatures) is a great bonus for the book. There will be future purchases as gifts for my more talented family members. Maybe they will see the things I see, and now understand that it is not complete madness (watch for floating balloons).

Coloring books for adults -- they're all the same. Intricate designs and shapes for us to fill in as a means of meditation. Essentially, they're all kind of boring. But this one stands out because it ditches the swirlies, blocks and triangles for actual images of creatures doing amazingly bizarre things, and each image has its own story to go along with it. It's far more interesting than any other adult coloring book out there. (I had to tell my niece & nephew they weren't allowed to color in it.)

I love this book! If you are a fan of completely off the wall creatures, or just a fan of saying: "How would you even think of this stuff!?", then this is your book. I've always had to have something else going on in the background when I'm coloring (like a TV show, or a Movie) but this book just sucked me in from start to.... well... i still haven't finished... So start to page 3!
