## Customer Reviews

The symphonies of Gustav Mahler can be listened to on more than one level. As complex and forward-looking as they are, they nonetheless can connect at an elemental, "visceral" level for many listeners. However, for a fuller appreciation of both the details and the profundity which are in these works, as well as for insight into Mahler's creative processes, some outside help is required, and this help is usually not forthcoming from the liner or booklet notes that accompany recordings, or from the program notes that accompany performances. This is precisely where this excellent book by Constantin Floros fits in. First, a few words on what this book is not, and does not purport to be. It is not a comparative discography of available performances; in fact, it neither lists nor recommends recordings. Second, it is not a critical biography of Mahler; the interested reader is referred to the outstanding (but much more expensive) volumes by Henry-Louis de la Grange, available elsewhere at [amazon.com](#). Third, it is not a psychological study of Mahler, relating, as such a study might, such connections between the man and the music; an excellent small volume by Theodor Adorno, "Mahler: A Musical Physiognomy" covers that territory very well, and is also available elsewhere at [amazon.com](#). Fourth, and finally, it is not a set of musical scores of the symphonies; those as well,

published by Dover in inexpensive paperback editions, can be found at .com So, just what is this Floros book? It is the perfect companion for the serious Mahlerite in understanding the genesis and the thematic, harmonic and interpretational details of each of Mahler's ten symphonies, and the interrelationships and comparisons among them.
