The "Publication Manual" is the style manual of choice for writers, editors, students, and educators. Although it is specifically designed to help writers in the behavioral sciences and social sciences, anyone who writes non-fiction prose can benefit from its guidance. The newly-revised Sixth Edition has not only been rewritten. It has also been thoroughly rethought and reorganized, making it the most user-friendly "Publication Manual" the APA has ever produced. You will be able to find answers to your questions faster than ever before. When you need advice on how to present information, including text, data, and graphics, for publication in any type of format--such as college and university papers, professional journals, presentations for colleagues, and online publication--you will find the advice you're looking for in the "Publication Manual."

**Customer Reviews**

I just want to put to rest some of the previous concerns about this being an outdated issue. I'm a doctoral student, so having the latest version of this manual is paramount to the success of my program. That being said, I researched whether or not I should purchase this manual from , and almost didn't given some of the past negative reviews. I went with my instincts, however, trusting that a major retailer like would always offer the latest printing of a given text. Needless to say, I was right in doing so. I ordered this book February 27, 2012, and according to the inside of my copy, this is the fifth printing (January 2011) of this book. Rest assured that if you order from , you’re getting
I was very irritated to find that many errors existed in the 6th edition. I also contacted APA regarding
the errors. They are not going to exchange the book for a corrected edition. They made several lame excuses for the errors and for not replacing it. My second email to APA pointedly expressed my displeasure with their stance - copied below...To have grammar and writing errors in a book about grammar and writing is shameful. How much does your organization really care about the reputation it is presenting? Do you have editors reviewing your works before publication? Are your editors paying attention to their work? If you cannot hold yourself to the standards you have set out in your own publication, then your publications should not exist! If you need this book, demand a corrected reprinting! If you are a university, you also demand a corrected reprint. This organization should not set standards they are not going to comply with. I give them an "F" Update: 3 months after submitting my complaint to APA I received a letter stating that a reprint was in the works and that anyone who bought the edition with all the mistakes would have a short time span to return it, without charge and postage covered, for the corrected addition. My faith was somewhat restored in the power of honest critical reviews. Update 2: received the corrected version and all the mistakes I found in the 6th ed. have been corrected. their book now gets a "B" but the organization still gets a "C" for the "holier than thou attitude".
