Customer Reviews

I enjoyed the writing more than the actual spaces featured. I thought the philosophy of design is right on , but that many of the spaces featured did not match the editorial, they felt contrived and uncomfortable to actually live in.

I thought this book would be more Zen like but it's more like a gray day that looks like it's going to rain. I think there are other books that I might have liked better than this one. I passed this on to a

friend.

lovely shelter book. i only wish that there had been more interiors of more individuality by real homeowners instead of designers.

Interiors are nice, but photography is lackluster and writing is gibberish.

A beautifully written book about the elements of living in one's home with personal style. The simple elegance of the photographs mirror the prose. Karen Lehrman Bloch has a deep respect for her readers, bringing us along as she opens us up to the possibilities of being at home. I have given The Inspired Home as a hostess gift on several occasions. And, I've recommended it to those I know will appreciate the interiors, as well as the thoughtfulness of the writing. I highly recommend it.
