My interest began when I first heard about adult coloring books at a bridge game last fall. However I discovered I didn't want to color in lines drawn by someone else. This led me to discovering Zentangle and purchase several different authors' books starting 12-25-15. As I settled into the first book by Beckah I realized by page 50 that I definitely wanted her newest book. I tangle every day and am working very slowly through the first book. *Tangle Journey* arrived this week and it is beautiful and what I look forward to studying after I finish my journey through *One Zentangle A Day*. I am a former quilter and enjoy working with patterns and design but at 86 I wanted something smaller to work with and this is it for me. So not only do I applaud Beckah but also the tangle community!

A perfect fusion of art instruction and technique, plus bookbinding! If you've already mastered some basic tangle patterns, this is the next step towards becoming an artist. Homemade portfolio in hand, you'll be ready to draw where and whenever you like. I devoured this book in one sitting and I can't wait to start on the projects...especially the Coptic-Bound Book.

Very nicely written and great pictures that show how to make the different types of presentation cases/books to show off your Zentangles. I was on the fence about buying this book based on some reviews, but I am glad that I decided to buy it. Very informative information on the process.

I was really disappointed with this book. The biggest problem is that the examples are unattractive. Nothing made me say, I want to make something like that. A good chunk of the book is taken up with instructions on how to sew your very own journal from scratch in various configurations. There are also several obvious ideas that are usually covered in beginner level tangle books like using various cross hatch and squiggle patterns for shading, making use of different sized markers to vary line thickness and looking to the world around you for pattern inspiration. I was really disappointed to see that the sections on different types of shading were illustrated the same way they would be in any generic art instruction book and then applied to one single pattern tangle. There are also some examples of applying tangle to various media which were for the most part uninspiring. The examples used much thicker lines due to the media being used but weren't done on a larger scale which yielded designs that looked rough and amateurish. The handful of things that are intricate and attractive offer no guidance on how to get a similar look. There is also an appendix with steps for drawing a couple dozen tangles, most of which did not appear in her "One Zentangle a Day" book.

I enjoy Beckah Krahula's teaching and artistic style as exemplified in this book. Very helpful to this tangler of only one year's experience.

Some repeats of her earlier books, but a lot of good ideas. I will share with my granddaughter.

Great 2nd book from Beckah
